MONTHLY CHARGE-OFF AND DELINQUENCY STATISTICS

AS OF AND FOR EACH OF THE THIRTEEN MONTHS ENDED

(unaudited, \$ in billions)

The following table provides monthly charge-off and delinquency statistics as of and for each of the thirteen months ended April 30, 2022.

The year over year increase in the over-30 day loan delinquencies as a percentage of period-end loan receivables (the "30+ delinquency rate") at April 30, 2022 includes the effects of the reclassification of loan receivables related to the Gap Inc. and BP portfolios to loan receivables held for sale. Excluding the Gap and BP programs, the 30+ delinquency rate at April 30, 2022 was up approximately 10 basis points versus prior year. The year over year decrease in net charge-offs for the month ended April 30, 2022 reflects the prior improvements in customer payment behavior.

(1) Charge-offs are executed on charge-off cycle dates which occur on various days during each calendar month. The number of different charge-off cycle dates in each month varies based on such factors as the calendar and the timing of billing cycles. As a result, the amount of charged-off loan receivables can vary between monthly periods with no corresponding change in the performance of the portfolio. The following table sets forth the number of different charge-off cycle dates for our consumer credit card loan receivables, which represent approximately 95% of total period end loan receivables at April 30, 2022, for the calendar months indicated.

	2021	2022
January	28	28
February	28	28
March	29	28
April	27	26
May	28	30

October	28	28
November	28	29
December	28	25

(2) Represents adjustment to allocate recoveries, including debt sales, evenly across the three calendar months of each respective quarterly reporting period. The adjustments for periods other than for the last month of each calendar quarter incorporate estimated recoveries for the applicable full quarterly reporting period. Such estimates are subject to change within each applicable quarter and may differ from actual quarterly results.

(3) Adjusted net charge-offs represent a non-GAAP financial measure. Adjusted net charge-offs as a % of average loan receivables, including held for sale, represent the Company's net charge-off rate for each month including the 'recovery adjustment' defined above. We believe the presentation of this measure is useful to investors as it represents a monthly measure which is more indicative of both our quarterly and annual net charge-off rates.
