MONTHLY CHARGE-OFF AND DELINQUENCY STATISTICS

AS OF AND FOR EACH OF THE THIRTEEN MONTHS ENDED

(unaudited, \$ in billions)

The following table provides monthly charge-off and delinquency statistics as of and for each of the thirteen months ended May 31, 2018. The increase in net charge-offs for the month ended May 31, 2018 compared to the prior year was primarily due to credit normalization partially offset by one less charge-off cycle per the table below. There is no change to the Company's expectations for both our net charge-off rate for the year ended December 31, 2018 and our loan loss reserve build in the second quarter of 2018 from the outlook provided during the Company's 1Q 2018 earnings conference call held on April 20, 2018.

(1) Charge-offs are executed on charge-off cycle dates which occur on various days during each calendar month. The number of different charge-off cycle dates in each month varies based on such factors as the calendar and the timing of billing cycles. As a result, the amount of charged-off receivables can vary between monthly periods with no corresponding change in the performance of the portfolio. The following table sets forth the number of different charge-off cycle dates for our consumer credit card receivables, which represent greater than 96% of total period end receivables at May 31, 2018, for the calendar months indicated.

	2017	2018
January	30	29
February	28	28
March	28	25
April	28	30
May	29	28
June	27	26
July	28	30
August	28	28
September	26	28
October	30	29
November	28	27
December	28	28

(2) Represents adjustment to allocate recoveries, including debt sales, evenly across the three calendar months of each respective quarterly reporting period. The adjustments for periods other than for the last month of each calendar quarter incorporate estimated recoveries for the applicable full quarterly reporting period. Such estimates are subject to change within each applicable quarter and may differ from actual quarterly results.

(3) Adjusted net charge-offs represent a non-GAAP financial measure. Adjusted net charge-offs as a % of average loan receivables, including held for sale, represent the Company's net charge-off rate for each month including the 'recovery adjustment' defined above. We believe the presentation of this measure is useful to investors as it represents a monthly measure which is more indicative of both our quarterly and annual net charge-off rates.
